GLOCK 19

»SAFE ACTION«
9mm Parabellum

PERFECTION

THE GLOCK 19...MORE OF WHAT YOU WANT IN A COMPACT WEAPON.

From its unmatched firepower to its remarkable accuracy, the Glock 19 Compact, semi-automatic 9mm pistol is your most reliable choice in a compact defense weapon. Built with the same polymer technology as the full size world famous Glock 17, it offers you superior handling features that no other pistol on earth can match. For total protection the Glock 19 Compact is the only weapon you'll need.

MORE FIREPOWER...

Comes standard with a 15 round capacity using hard-hitting 9mm par-
abellum ammunition. Optional 17
round magazine also available.

MORE COMPACT...

The Glock 19 is the most compact 18 shot 9mm weapon ever developed. Shown here, its length is only 7.30" and height (including sight) is just 4.64" with standard 15 round magazine, inserted.

NEW!
Available March '88

MORE LIGHTWEIGHT...

Space age polymers give the Glock 19 Compact a remarkable low empty weight of only 24 ozs.

MORE SAFETY...

The Glock 19's "Safe Action" design gives you three unique safety systems. By simply removing your finger from the trigger, you automatically uncock the pistol's firing mechanism. This effortless motion also activates (1) the trigger safety, (2) the firing pin block safety and, (3) the drop safety, eliminating the need for manipulating any manual safety devices or decocking levers.

GREATER ACCURACY...

The ergonomically designed natural grip angle of the Glock 19 Compact will enhance your instinctive shooting abilities. Even under the most adverse conditions (wet,

heat, cold), the new grip design with the grooved front and back strap allows positive comfort and controlled shooting. Excellent pointability and consistent trigger pull result in a high accuracy potential for each shot.

MORE RELIABILITY...

The Glock 19 has been tested in mud, sand and rain, as well as in temperatures ranging from -40 C (-104F) to +200C (+392F) and has passed with flying colors. In one test alone it continuously fired 10,000 rounds without a misfire.

EASE OF CLEANING...

Take-down and maintenance is simple with the Glock 19 Compact. That's because it has only 33 parts (compared to the average pistol with 65 parts). All components are 100% interchangeable without hand fitting.

MORE CORROSION RESISTANCE...

The Glock 19 metal components are uniquely finished with the non-glare, matte Tenifer Process. This process protects metal components from the harmful effects of perspiration, salt water and airborne contaminants under normal conditions. The Glock 19's polymer components and specially treated steel parts offer you more resistance to corrosion than any other finish, including hard chrome plating, phosphates, bluing or stainless steel.
